

THE CHEMSS EDUCATION R&D NETWORK – meeting the growing needs in chemical and environmental safety and security education, training, research and talent acquisition

Global gathering of universities, research centers, academic institutions, laboratories, industries and training facilities

Development of sustainable chemical, environmental and food safety and security expertise in the whole chain of chemical activities

Development and talent acquisition of well-educated and trained workforce in safety and security in the whole chain of chemical activities, environment and energy sectors

Among core objectives

Develop and implement, together with governments, industries, academia, and international organizations, an Education and Training Chemical Safety and Security Plan - integrated education and training in chemical and environmental safety and security.

Offer Master of Science (MSc) programme, post-graduate programs, training courses and certificate programmes, which cover integrated chemical and environment safety and security and sustainable chemistry.
